So long ago as 1881, in a letter addressed to Dr. Schweinfurth, we are told by our Shanghai contemporary, EMIN laid it down as his conviction that it is not possible for Central Africa to be properly opened up except by means of the Chinese, and that if Chinese immigration into that wonderful and beautiful country, with all its rich resources, were properly taken in hand, the possibility would be afforded of effecting the required communication between the various settlements by means of the Chinese workmen, and a regular and fast increasing trade would be developed, that would repay a thousand-fold such an undertaking. For four years prior to the date of this letter, Emin writes, this scheme had been one of his dearest projects, and he looked for Dr. Schweinfubth's essistance and influence to carry it out, and begged the Doctor to endeavour to convert disposed of there. Happily the practice of tight lading, though till a fruitful source of illness, does not now (the Lancet remarks) cocupy a foremost place among the recognized eauses of death. The fact that it does occasionaly stand in this position, however, should be noted by those foolish ersons whose false taste and vanity have made them the suffering devotees of a custom so injurious. It should be remembered also that, whatever may be said of the more evident effects. the indirect consequences of thus tightly girding the body cannot be exactly estimated. They cannot but be hurtful. Chief among the disorders induced are those which concern the circulction, and it is to the labouring incapacity of a heart thus imprisoned and impeded both as regards the outflow and return of blood that we must attribute such disastrons consequences as buzon Sugar occurred a few days ago in a Berlin theatre. Mining One of the actresses, who had taken part in an evening performance, and then seemed to be perfectly well, was found next morning dead in ed. Subsequent examination of the body showed that death was_due to synoope, and this was attributed to tight-looing, which the deceased had practised in an extreme degree.

Mr. Madhowdas Bagnathdas, of Bombay. married a widow many years ago, and has written a book about it. .. He was forty-one years of ago at the time, and when his advertisement appeared offering Rs. 500 to anyone who would aid him in his purpose, his caste fellows were horrified. But Mr. Madbowdas was not to be turned from his purpose. He did his own court-ing, and be now publishes what was virtually the lady's offer of marriage and his reply of acceptance. Needless to say, there is not a touch of romance in either document, but the match was successful enough, except for the caste persecution which it provoked. For a time, the hold innevator had to take strong measures to secure himself against physical violence. The couple were out-casted, lawauits followed, and New Malwa for eighteen years they were subjected to every Old Malwa..... form of spiteful annoyance All this, however. Older Malwa.... they have practically lived down, and they have the satisfaction of witnessing a change of sentiment on the subject of widow marriage, to which their own brave example has in no small degree contributed. The story of their experiences, as briefly and simply told, is stranger and more interesting than many a chapter of fiction,

WITH THE PUNTS AND MANDABIN An Anglo-Chinese Dictionary, published at the examined at 11 A.M., 29th inst. For comprehensiveness and practical service

this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises or students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make th Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, schieving a clearness not previously attained, and dispensing with those vest margin and vacant spaces which have heretofore characterized Chinese publications. To illustrate the vast scope of the work the following facts are submitted for consideration:—

BONHAM

Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, student of this difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples FUENISHED or this work contains more than five times as many as any other Dictionary hitherto pub

HES. For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. West Indies, Vol. 30. To parties resident in England and interested in China it cannot but be invaluable occasion-

It comprises upwards of two thousand large Nations, and the Independent Empires and quarto pages.
